

Simplify onsite  
screening events  
with BioIQ HealthSync

Create seamless health screening events with BioIQ HealthSync for iPad and Android tablets. Manage appointment calendars, check in and screen participants digitally, and sync screening data so you can quickly share results.

### BioIQ HealthSync Enables

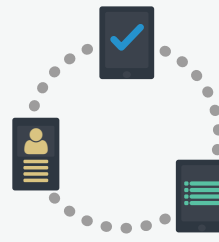

#### Streamlined Event Management

Access appointment schedules to quickly check in participants, or sign up walk-ins on the spot. 100 percent data matching ensures results are synced with the appropriate participant records in BioIQ's secure, HIPAA compliant cloud.

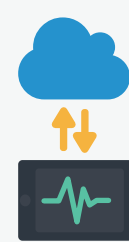

#### Scalable Screening Solution

Eliminate traditional paper forms and the need to enter screening data manually after the event. BioIQ HealthSync automatically syncs results, so both participants and sponsoring organizations can quickly determine next steps.

#### Seamless Participant Experience

Quickly access participant records, capture consent, review results and provide follow-up recommendations. Direct participants to next steps and provide custom recommendations based on their screening results.

#### Digital Results Capture

Enter screening results directly into the app and automatically sync participant results with their accounts in the BioIQ Participant Portal. Bluetooth integration with the Alere Cholestech LDX Analyzer automatically captures lipid profile, cholesterol and glucose readings.
