

# Close the colorectal cancer screening care gap by reaching your members at home.

BioIQ offers comprehensive screening programs using best in class test kits, and coordinates everything from member engagement to reporting results, so you can focus on connecting at-risk members to next steps in their care.

## Program Features

- Easy-to-read Lab Reports
- Alerts & Reminders
- Program Analysis
- Physician Orders
- Test Kit Deployment & Processing
- Multi-channel Communications

## How it Works

## About BioIQ's FIT Kit Test

- Inexpensive front-line screening option leads to fewer unnecessary colonoscopies.
- Can be completed independently at home using a single sample
- Automated processing eliminates human error and reduces costs
- Significantly more specific (fewer false positives) than any manual FIT\*
- The only FIT test called out by name by USPTF, ACS, CDC and ACG
